

# Matthias Weiß

I am a highly skilled software developer focused on frontend and web technologies with over 20 years of experience. The technologies I have been mainly using are Typescript and Javascript, including frameworks such as React - NextJS and Vue - Nuxt. I held a lead role in multiple projects, handling application architecture, UX design and being involved in ressource and sprint planning. Since 2017 I have been continuously working in projects of 5 - 20 team members. I am most comfortable in taking responsibility and bring valuable communication skills with team members and customers alike.

## Work experience
